LOT5400 Parker PVS1200 Portable Oil Purification Unit

Brand	Description	Qty	Price CAD	Price USD
Parker	Refurbished Parker PVS Portable Purification System Fully Tested and Operational	1	\$12,987.00	\$9,990.00

This Parker PVS Portable Purification System has been thoroughly refurbished and tested to ensure optimal performance. It comes complete with reusable coalescing elements, providing efficient filtration for your application needs.

Note:

A dirt element is not included in this package. If required, it can be added separately for an additional cost (IL8-3 adder). **Crating and shipping are not included** in the listed price and will incur an additional charge based on your location and requirements.

The Parker PVS system is designed to deliver superior water and particulate removal from hydraulic and lubrication systems. Its portable design and advanced purification capabilities make it an excellent choice for industrial applications requiring high-quality fluid maintenance.

For complete specifications and further details about this system, visit the Parker PVS Portable Purification System product page.

ALL PRODUCT GUARANTEED

Shipping, crating, tax and customs charges (if applicable) are not included in price.
